**General  
information**

1. The template includes numerous features, including automated comments and validation messages, to assist in the preparation and review of financial data.
2. The first section in the **Component Unit Template** tab includes some adjusting journal entries made for the prior year. Consideration should be given as to whether similar adjustments should be made in the current year.
3. If a template amount has a footnote number reference, the corresponding spreadsheet tab must be completed.

information**  
*(continued)*

4. **FASB Lease Requirements** - If a foundation is the **lessee**, record Operating Lease Liabilities and Finance Lease Liabilities on the Component Unit Template's Long-Term Liabilities-Other - Due within One Year for the current portion and the Long-Term Liabilities-Other - Due Greater than One Year for the noncurrent portion. Report the Operating Lease Right-of-Use-Assets and Finance Lease Right-of-Use Assets on the applicable Component Unit Template's Capital Asset and/or Other Assets line items.
  
5. A fluctuation analysis for the component unit template comparing the current and prior year's financial statement template activity requires explanation. Significant variances must be explained. The fiscal year 2023 amounts will automatically populate when the component unit entity selects its name from the drop-down list on the Component Unit Template tab. If a "yes" displays in the column titled "Is a fluctuation explanation required?" additional information is needed. If you provide audited financial statements, the fluctuation analysis does not have to be completed. The audited financial statements need to accompany the template for the fluctuation analysis to not be required.
  
6. Provide explanations for the fluctuation analysis on the **Template Flux** tab. In your explanations provide the underlying reasons (i.e., management decision, trend, event) for the change, do not just state the item increased or that the item increased because another item decreased.

**Informational-  
Restricted  
Receivables, Net**

---

**The Restricted Receivables, Net line item is to show restricted receivables that are less liquid. Receivables that meet either of the criteria below, excluding contributions receivables for foundations, should be reported on the Restricted Receivables, Net line item:**

- Restricted Receivables, Net amounts expected to be collected in greater than one year; **or**
- Restricted Receivables, Net amounts expected to be collected in greater than one year and a portion of these receivables is expected to be collected within one year.

Exception: Amounts **not** included are restricted receivable, net amounts that are expected to be collected within one year **and** that do not have a portion expected to be collected in greater than one year. Since these are considered current assets and are more liquid, they should be reported on the Receivables, Net line item.

**Appendix 1, Schedule of Cash, Cash Equivalents, and Investments**

---

**Definitions**

**Cash** – The standard medium of exchange (paper currency) that must be readily available for the payment of current obligations, and it must be free from any contractual restriction that limits its use in satisfying debts.

**Cash Equivalents** – Instruments or investments of such high liquidity (original maturity of 90 days or less) and low risk that they are virtually as good as cash. Examples are a money market fund, Treasury bill, monies in the State Non-Arbitrage Program (SNAP), and the Local Government Investment Pool (LGIP). Whether an asset is a cash equivalent is determined only once based on the length of the original maturity when the asset is first acquired.

**Investments** – Securities and other assets that are (a) held primarily for the purpose of obtaining income or profit and (b) have present service capacity based solely on its ability to generate cash or to be sold to generate cash with an original maturity greater than 90 days. This includes securities, which are transferable financial instruments that evidence ownership or creditorship.

**Security** – A transferable financial instrument evidencing debt obligation of, or equity ownership in, a common enterprise. The term includes notes, stocks, bonds, debentures, or other forms of negotiable and nonnegotiable instruments that evidence indebtedness or ownership.

Accurate completion of this tab is required in order to report footnote information for foundations in the Annual Comprehensive Financial Report.

List the fair value of cash equivalents and/or investments (restricted and unrestricted) not held with the Treasurer of Virginia and SNAP Individual Portfolio (cash equivalents and investments). The amounts (including SNAP Individual Portfolio amounts) should be reported in the “Cash Equivalents” column if the original maturity is 90 days or less and they should be reported in the “Investments” column if the original maturity is greater than 90 days. “ERROR” messages will appear if amounts do not agree to the cash equivalents and/or investments amounts listed in Part 7 on **Tab 1A – Detail Fdn.** In addition, answer whether any amounts reported in the cash equivalents and/or investments columns are reported at cost rather than fair value.

## **Appendix 2: Revenue Classifications**

---

### **Revenue classifications**

Revenue amounts must be analyzed to determine the proper reporting on the Component Unit Template in accordance with **GASBS No. 34**. See also **GASBS No. 37** and the applicable Implementation Guides for additional guidance. Below is a brief description of the revenue line items:

- **Program Revenues – Charges for Services:** This includes exchange or exchange-like transactions. These revenues arise from charges to customers, applicants or others who purchase, use, or directly benefit from the goods, services, or privileges provided, or are otherwise directly affected by the services. Examples of this category are as follows: fees charged for specific services, licenses, permits, and other amounts charged to service recipients. In addition, fines and forfeitures are also included because they result from direct charges to those who are otherwise directly affected by the program or service even though they receive no benefit. (see **GASBS No. 34** and **GASBS No. 37**, paragraph 13, which amends **GASBS No. 34**, paragraph 49)
- **Program Revenues – Operating Grants and Contributions (program-specific operating grants & contributions):** This represents revenues arising from mandatory and voluntary nonexchange transactions with other governments, organizations, or individuals that are restricted for use in a particular program. Also, if a program specific grant and/or contribution can be used for operating and capital purposes, they should be reported as Program Revenue-Operating Grants and Contribution. (see **GASBS No. 34**, paragraph 50)
- **Program Revenues – Capital Grants and Contributions:** This has the same definition as operating grants and contributions except the restriction is for capital purposes (see **GASBS No. 34**, paragraph 50).
- **Unrestricted Grants and Contributions: (nonspecific grants & contributions):** This represents grants and/or contributions that do not meet the definitions of program revenues (see **GASBS No. 34**, paragraph 50).

---

**General  
revenue-  
investment  
earnings**

**Investment earnings\*:** This represents interest, dividends, unrealized gains/losses on investments, realized gains/losses, and other investment earnings on investments that **do not** meet the definition of program revenue. For example, investment earnings on permanent or term endowments should be reported as program revenue if restricted to a program or programs specifically identified in the endowment agreement or contract. Investment earnings not meeting the definition of program revenues should be reported as General Revenues - Investment Earnings (see **GASBS No. 34**, paragraphs 51 & 52). **Based on this definition, investment earnings may be reported on more than one Component Unit Template line item.**

**\*For foundations only:** Negative or positive changes in the fair value of derivative instruments – interest rate swaps should also be reported as Investment Earnings.

---

**General  
revenue -  
miscellaneous  
revenue**

**Miscellaneous revenue:** Represents revenue amounts that do not fall under any other financial statement template line item definition.

---

**Contributions  
to permanent &  
term  
endowments**

The Contributions to Permanent and Term Endowments line item should include the following:

- **Contributions to Permanent Endowments:** Represents funds with respect to which donors or other outside agencies have stipulated that the principal be maintained in perpetuity and invested for the purpose of producing present and future income which may either be expended or added to the principal. (Note: A foundation’s permanently restricted contributions should be included.)
  
  - **Contributions to Term Endowments:** Similar to permanent endowments except that upon passage of a stated period of time or the happening of a particular event, all or a part of the principal may be expended.
-
